Behavior Management Series

Eden II is committed to providing training and educational opportunities for learning across all of our employees. In the interest of facilitating career development and improving our agency's ability to deliver quality services to children and adults with autism we have created the Behavior Management Series. This series will provide employees a more comprehensive understanding on behavioral concepts and techniques. The first hour will focus on theory and relevant research. The second hour will provide a more detailed hand's-on concept such as role playing, creating materials, and/or understanding any technology that might apply. Please contact your supervisor if you are interest in attending any of these trainings. Each presentation will be held from 10:00-12:00pm at 94 Wright Ave conference room.

- | | |
|--------------------|--|
| September 7, 2016 | Autism/ABA: Diagnosis Criterion of ASD and ABA as an Evidence Based Effective Treatment (Michael Cooney) |
